

# Do you know that you are at risk for these diseases??

## *Human Papillomavirus (HPV)*

- **The odds are against you ....** At least 50 percent of sexually active people will get genital HPV and most won't know they have it.
- **Are you willing to take that chance ...** The HPV vaccine prevents 70 percent of cervical cancer and 90 percent of genital warts.
- **We're here to help ...** All health departments are providing the HPV vaccine **FREE** to all females 19-26 years of age, regardless of insurance status; and to males and females 9-18 years of age with no health insurance, on Medicaid or PeachCare.

## *Tetanus Diphtheria and Acellular Pertussis (Tdap)*

- **There were more than 1,300 cases of** Pertussis disease reported in the United States in 2008 and the number of cases peaks every 3-5 years.
- **A teenager or adult could get Pertussis** and give it to an infant who can die from Pertussis.
- **Tdap vaccine is available for FREE** at all health departments to anyone 10-64 years of age regardless of insurance status.

Visit one of the Cobb & Douglas Public Health center locations or visit our website at [www.cobbanddouglaspublichealth.org](http://www.cobbanddouglaspublichealth.org) or any local health department ... There may be other vaccines you need.
